

FEJIRO EFIUWVERE

AI Workflow & Product Strategy Engineer

Target Lane: AI Workflow, Product Strategy, Automation, Secure Workflow Systems
Whitby, Ontario, Canada | +1 (416) 473-2732 | fejiro.efiuwvere@gmail.com | linkedin.com/in/fejiro-efiuwvere | github.com/fejiro | unalabs.cloud
Canadian citizen. TN-eligible under USMCA for qualifying U.S. professional roles.

PROFESSIONAL SUMMARY

AI workflow and product strategy engineer with enterprise systems depth across APIs, secure workflows, human-in-the-loop approvals, product discovery, technical architecture notes, requirements, UAT, reporting, and implementation governance. Combines founder-level product thinking with practical delivery experience across retail, government, logistics, SaaS, ERP, WMS, POS, cloud integrations, and data-driven workflow modernization.

KEYWORD ALIGNMENT

AI Workflow | Product Strategy | LLM Tooling | Agentic Systems | Human-in-the-Loop | Approval Workflows | Secure Workflow Architecture | MCP | LLM Proxies | API Integrations | Automation | Technical Documentation | Product Discovery | Requirements | UAT | Audit Logs | Governance | Prompt Engineering

CORE SKILLS

- AI-assisted workflow design
- Product strategy and technical discovery
- Human approval gates and audit-ready workflows
- LLM-assisted prototyping and prompt discipline
- API integrations and tool-access patterns
- Secure workflow architecture concepts
- Technical documentation and reference architecture
- UX flows, acceptance criteria and delivery roadmaps
- SaaS product planning and stakeholder feedback loops
- Governance, privacy and responsible AI considerations

PROFESSIONAL EXPERIENCE

FTC / Una Labs | Principal Consultant | Toronto, Ontario, Canada | Nov 2025 - Present

- Founded and led PeacePad product strategy, designing AI-assisted communication safeguards, tone moderation, structured dialogue, shared workflows, reporting, and responsible AI considerations.
- Design ATEAM and Una Labs workflow concepts around intake, approval gates, agent-style delegation, technical documentation, delivery proof, and human control points.
- Translate ambiguous founder, client, legal, mediation, and product needs into workflows, architecture notes, user journeys, acceptance criteria, and implementation-ready backlog items.
- Create public product strategy artifacts and reference-style documentation for secure AI agent access, MCP-style gateways, approval controls, private service access, and auditability.

Ministry of Finance - RIDE-TI Project | IT Consultant | Oshawa, Ontario, Canada | Apr 2025 - Dec 2025

- Supported secure modernization of revenue processing and document management systems serving 120+ government programs with compliance, auditability, validation evidence, and operational controls.
- Built test plans, automation scripts, traceability matrices, and reporting that supported workflow reliability, risk visibility, and stakeholder confidence.
- Reduced processing errors by 30% and reconciliation issues by 25% through validation discipline, process improvement, and governance controls.
- Translated public-sector operational requirements into structured technical validation, issue triage, reporting, and modernization evidence.

Talize | Information Technology Business System Manager | Toronto, Ontario, Canada | Jan 2024 - Oct 2025

- Led retail technology and business systems modernization across multi-location stores, aligning executive priorities, store operations, vendors, and technical teams around reliability, scalability, and customer experience.
- Directed POS modernization, loyalty API delivery, ERP, inventory and accounting integrations, operational reporting, release planning, vendor coordination, and governance.
- Managed vendor relationships, implementation scope, escalations, issue triage, UAT planning, production support, and long-term platform scalability for retail technology partners.
- Improved transaction processing speed and reduced store-level downtime by 40% through rollout governance, UAT discipline, production support improvements, and stronger vendor accountability.

The Home Depot Canada | Senior Business Systems Analyst | Toronto, Ontario, Canada | Sep 2020 - Apr 2021

- Supported SAP microservices fulfillment initiatives including Ship-To-Home, Buy-Online-Pay-In-Store, Buy-Online-Ship-To-Store, and Buy-Online-Deliver-From-Store capabilities.
- Mapped API endpoints to business use cases, maintained user stories and acceptance criteria in Jira, and documented technical workflows for automation handover.
- Supported SAP to Google Cloud data integration including subscriber APIs, GCP data migration, ETL validation, Postman documentation, and service management activities.
- Coordinated SIT, UAT, go-live readiness, production support, and performance optimization for cloud-connected fulfillment platforms.

Canadian Tire Corporation | Business Acceptance Test Lead | Greater Toronto Area, Canada | May 2021 - Dec 2023

- Led UAT planning and business acceptance for large-scale retail technology initiatives, including POS upgrades, loyalty enhancements, omnichannel workflows, and store process improvements.
- Translated business requirements into technical specifications, user stories, acceptance criteria, test scripts, release evidence, and deployment readiness artifacts.
- Partnered with vendor teams, product owners, QA, store leadership, and corporate stakeholders to manage issue triage, system adoption, release readiness, and post-release stabilization.
- Analyzed system performance and data integrity issues, identified root causes, and coordinated corrective actions to reduce operational disruption.

Sears Canada | Senior Business Analyst / Business Analyst | Toronto, Ontario, Canada | May 2015 - Aug 2017

- Supported Manhattan WMOS across 10 pilot distribution centers, including migration from AS400 legacy WMS, upgrades, enhancements, inventory workflows, and fulfillment process improvements.
- Improved inventory visibility and developed advanced wave flow logic for different client, stock, and order profiles to improve outbound handling efficiency.
- Led requirements and development coordination for a web service synchronizing retail inventory and NetSuite WMS for real-time order notification through SMS, URL, and UI.
- Led QA for a mobile-based loyalty card application covering coupon loading, point balance, discount application, rewards collection, Selenium testing, and Jira defect tracking.

NNPC | Senior Business Analyst Project Lead | Lagos, Nigeria | Mar 2008 - Dec 2013

- Led ERP, mobile, web, and workplace virtualization projects across government, telecommunications, and oil and gas clients in fast-paced delivery environments.
- Supported Microsoft Dynamics NAV and JD Edwards functional modules including Sales Order Management, GL, AP, AR, Manufacturing, EDI, Procurement, Transportation, Warehouse, Fixed Assets, Master Data, Inventory, and Advanced Pricing.
- Worked with stakeholders, solution teams, development teams, QA, and project managers to prioritize requirements, confirm scope, and execute delivery plans.
- Managed up to 15 teams across multiple projects while maintaining quality, schedule discipline, and client delivery expectations; used PMBOK, RFI, RFP, RFQ, SLAs, Oracle, SQL Server, and MS Project.

EDUCATION

- Post Graduate Diploma, Supply Chain & Logistics Management - St. Lawrence College, 2015
- Post Graduate Diploma, Wireless Technology - Humber College, 2014
- Bachelor of Applied Science, Electrical and Electronics Engineering - University of Port Harcourt, 2009

CERTIFICATIONS & TOOLS

ServiceNow Certified Implementation Specialist - IT Service Management | Prompt Engineering with ChatGPT | Safeguarding Customer Credit Card Data: PCI Compliance | REST API | Project Management Foundations | ITIL Foundations V3

Tools: Jira, Confluence, ServiceNow, SharePoint, Azure DevOps, SQL, Postman, SAP, Google Cloud Platform, Manhattan WMOS, NetSuite WMS, Logfire, Salesforce, Oracle, Microsoft Dynamics NAV, JD Edwards, HP ALM, Zephyr, Selenium, FastTrack, Linux, EDI, REST APIs
