Canadian citizen. TN-eligible under USMCA for qualifying U.S. professional roles.

PROFESSIONAL SUMMARY

Senior business systems analyst with 15+ years of experience translating business needs into requirements, user stories, functional specifications, acceptance criteria, process flows, test plans, and implementation-ready delivery artifacts. Strong background across retail, logistics, government, ERP, WMS, POS, APIs, UAT, data validation, vendor coordination, stakeholder workshops, and operational process improvement.

KEYWORD ALIGNMENT

Business Analyst | Business Systems Analyst | Requirements Gathering | BRD | FRD | User Stories | Acceptance Criteria | Use Cases | Process Mapping | UAT | SIT | API Testing | SQL | Jira | Confluence | Stakeholder Workshops | Data Validation | Change Requests

CORE SKILLS

- Requirements gathering and documentation
- BRD, FRD, user stories and acceptance criteria
- Business process mapping and workflow analysis
- Use cases, wireframes and solution walkthroughs
- UAT, SIT, test planning and traceability
- API, SQL and data validation
- Defect triage and release evidence
- Vendor and stakeholder coordination
- Change impact analysis
- Training, go-live and hypercare support

PROFESSIONAL EXPERIENCE

Talize | Information Technology Business System Manager | Toronto, Ontario, Canada | Jan 2024 - Oct 2025

- Led retail technology and business systems modernization across multi-location stores, aligning executive priorities, store operations, vendors, and technical teams around reliability, scalability, and customer experience.
- Directed POS modernization, loyalty API delivery, ERP, inventory and accounting integrations, operational reporting, release planning, vendor coordination, and governance.
- Managed vendor relationships, implementation scope, escalations, issue triage, UAT planning, production support, and long-term platform scalability for retail technology partners.
- Improved transaction processing speed and reduced store-level downtime by 40% through rollout governance, UAT discipline, production support improvements, and stronger vendor accountability.

Ministry of Finance - RIDE-TI Project | IT Consultant | Oshawa, Ontario, Canada | Apr 2025 - Dec 2025

- Supported modernization of Ontario revenue processing and document management platforms serving 120+ government programs, working with multi-disciplinary teams, vendors, and public-sector stakeholders.
- Validated high-volume payment and imaging workflows; developed test plans, automation scripts, traceability matrices, and compliance validation evidence.
- Reduced processing errors by 30% through structured QA, defect analysis, workflow validation, governance controls, and cross-functional issue resolution.
- Introduced governance and audit standards that reduced reconciliation issues by 25% and improved transparency, compliance, and operational readiness.

Canadian Tire Corporation | Business Acceptance Test Lead | Greater Toronto Area, Canada | May 2021 - Dec 2023

- Led UAT planning and business acceptance for large-scale retail technology initiatives, including POS upgrades, loyalty enhancements, omnichannel workflows, and store process improvements.
- Translated business requirements into technical specifications, user stories, acceptance criteria, test scripts, release evidence, and deployment readiness artifacts.
- Partnered with vendor teams, product owners, QA, store leadership, and corporate stakeholders to manage issue triage, system adoption, release readiness, and post-release stabilization.
- Analyzed system performance and data integrity issues, identified root causes, and coordinated corrective actions to reduce operational disruption.

The Home Depot Canada | Senior Business Systems Analyst | Toronto, Ontario, Canada | Sep 2020 - Apr 2021

- Supported SAP microservices fulfillment initiatives including Ship-To-Home, Buy-Online-Pay-In-Store, Buy-Online-Ship-To-Store, and Buy-Online-Deliver-From-Store capabilities.
- Mapped API endpoints to business use cases, maintained user stories and acceptance criteria in Jira, and documented technical workflows for automation handover.
- Supported SAP to Google Cloud data integration including subscriber APIs, GCP data migration, ETL validation, Postman documentation, and service management activities.
- Coordinated SIT, UAT, go-live readiness, production support, and performance optimization for cloud-connected fulfillment platforms.

LCBO | Lead BA / QA Analyst | Toronto, Ontario, Canada | Sep 2019 - Apr 2020

- Led functional, API, integration, SIT, and UAT testing for warehouse and ecommerce system enhancements, working with vendor teams, business owners, IT, and executive stakeholders.
- Supported LCBO Durham Warehouse implementation activities including test data setup, post-production testing, user training, UAT support, and operational validation.
- Escalated critical defects with cross-functional teams and Manhattan support while managing daily defect triage, test execution reporting, and closure governance.
- Validated Manhattan WMOS configuration changes including transactions, inbound rules, put-away rules, tasking, waving, PIX, and warehouse application enhancements.

SCI Group Inc. | Business Analyst | Toronto, Ontario, Canada | Jan 2018 - Sep 2019

- Managed continuous improvement initiatives across WMS, order processing, shipping workflows, SQL data updates, and system change management to reduce cost and improve productivity.
- Developed and implemented enhanced order download logic across EDI, UTE, and CSM channels, increasing WMS processing speed to 140-150 orders per minute.
- Worked with third-party development teams to deliver WMS shipping enhancements, including real-time weight validation and SQL updates across manual and automated shipping tables.
- Managed client expectations, QA planning, risk identification, documentation, and project status reporting during high-volume Black Friday operations.

Sears Canada | Senior Business Analyst / Business Analyst | Toronto, Ontario, Canada | May 2015 - Aug 2017

- Supported Manhattan WMOS across 10 pilot distribution centers, including migration from AS400 legacy WMS, upgrades, enhancements, inventory workflows, and fulfillment process improvements.
- Improved inventory visibility and developed advanced wave flow logic for different client, stock, and order profiles to improve outbound handling efficiency.
- Led requirements and development coordination for a web service synchronizing retail inventory and NetSuite WMS for real-time order notification through SMS, URL, and UI.
- Led QA for a mobile-based loyalty card application covering coupon loading, point balance, discount application, rewards collection, Selenium testing, and Jira defect tracking.

The Brick | Business Process Analyst | Mississauga, Ontario, Canada | Jan 2014 - Apr 2015

- Supported SAP Materials Management, Sales and Distribution, and WMS initiatives improving inventory control, distribution cost, service levels, and store support after The Brick and Leon's merger.
- Contributed to outcomes including 54% reduction in inventory holding requirements, 40% reduction in distribution costs, 43% improvement in store service levels, and 15% productivity improvement within one week.
- Supported transportation procurement and TMS planning, reducing RFP cycle time from several months to 6-8 weeks and enabling quarterly carrier bidding.
- Coordinated QA for the Click and Pick Up mobile furniture shopping app covering product browsing, payment, pickup scheduling, performance, and backend SQL validation.

NNPC | Senior Business Analyst Project Lead | Lagos, Nigeria | Mar 2008 - Dec 2013

- Led ERP, mobile, web, and workplace virtualization projects across government, telecommunications, and oil and gas clients in fast-paced delivery environments.
- Supported Microsoft Dynamics NAV and JD Edwards functional modules including Sales Order Management, GL, AP, AR, Manufacturing, EDI, Procurement, Transportation, Warehouse, Fixed Assets, Master Data, Inventory, and Advanced Pricing.
- Worked with stakeholders, solution teams, development teams, QA, and project managers to prioritize requirements, confirm scope, and execute delivery plans.
- Managed up to 15 teams across multiple projects while maintaining quality, schedule discipline, and client delivery expectations; used PMBOK, RFI, RFP, RFQ, SLAs, Oracle, SQL Server, and MS Project.

EDUCATION

- Post Graduate Diploma, Supply Chain & Logistics Management - St. Lawrence College, 2015
- Post Graduate Diploma, Wireless Technology - Humber College, 2014
- Bachelor of Applied Science, Electrical and Electronics Engineering - University of Port Harcourt, 2009
